

# Expanding Conference Papers for Submission to the IEEE Journal on Flexible Electronics (J-FLEX)

The IEEE Journal on Flexible Electronics (J-FLEX) encourages authors who have published at recent technical symposia, meetings and conferences to submit expanded, archival quality versions of their conference papers. This also includes the expanded papers in the special journal issues based the international conferences, particularly those supported by the journal's sponsors. Manuscripts of such expanded papers submitted for publication in the IEEE J-FLEX must clearly disclose the earlier publication, by providing in a first page footnote the IEEEExplore URL of the conference paper or its Digital Object Identifier (DOI) if it was published elsewhere. The manuscript must be prepared using the author guidelines available here: <https://ieeeflex.org/guidelines-for-authors/>.

It is difficult to specify precisely what authors should do in this expansion and improvement of their conference papers - each case will be unique. However, below we offer guidelines to help the authors decide what they wish to include in the expanded manuscripts.

- Use feedback obtained at the conference to update, revise, and rewrite the paper, as appropriate, to improve the paper's overall quality.
- Add new material to your paper. Typically, your conference paper will grow to 8 pages, which allows the inclusion of new text, figures and data.
- Include a footnote in the submitted manuscript stating, e.g., "An earlier version of this paper was presented at the XYZ Conference and was published in its Proceedings." and include a web-link to the already published paper.
- Include a statement in the introduction section, explaining what new has been included in the expanded version with respect to the conference paper.
- Highlight the new sections, figures, etc. in the expanded manuscript to expedite processing.
- Provide a copy of the original conference paper (upload an additional PDF file during the submission process).

All expanded papers will undergo our standard peer-review process. While manuscripts differ in topics, methodology and reporting style, we can say that expanded manuscripts which have followed the suggestions above are likely to have been received well by our Reviewers and Editors.

Expanded papers should be submitted through the Scholar One portal for the IEEE Journal on Flexible Electronics: <https://mc.manuscriptcentral.com/jflex>

Please check on the submission page if the Manuscript Type menu contains entry "Expanded Papers from the XYZ Conference". If a precisely matching entry is not available, please choose "Regular paper". Further details about publishing in the IEEE Journal on Flexible Electronics can be found at: <https://ieeeflex.org>
